

**B.Sc.,
COMPUTER SCIENCE &
INFORMATION TECHNOLOGY**

SYLLABUS

FROM THE ACADEMIC YEAR

2024– 2025

1. Introduction

B.Sc. Computer Science & Information Technology

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes elsewhere within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Learning Outcomes-based Curriculum Framework (LOCF) makes it student-centric, interactive and outcome-oriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the state which will help the students to ensure similar quality of education irrespective of the institute and location.

Computer Science is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. Computer science is a discipline that spans theory and practice and it requires thinking both in abstract terms and in concrete terms. Nowadays, practically everyone is a computer user, and many people are even computer programmers. Computer Science can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of computer science also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain. Computer science has a wide range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence,

Computational Science, and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. Computer Science is practiced by mathematicians, scientists and engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software.

The Students completing this programme will be able to present Software application clearly, make abstract ideas precise by formulating them in the Computer languages. Completion of this programme will also enable the learners to join teaching profession, enhance their employability for government jobs, software industry, banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

LEARNING OUTCOMES-BASED CURRICULUM FRAMEWORK GUIDELINES BASED REGULATIONS FOR UNDER GRADUATE PROGRAMME	
Programme:	B.Sc., Computer Science & Information Technology
Programme Code:	
Duration:	3 years [UG]
Programme Outcomes:	<p>PO1: Disciplinary knowledge: Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate Programme of study</p> <p>PO2: Communication Skills: Ability to express thoughts and ideas effectively; Communicate with others using appropriate media; confidently share one’s views; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups.</p> <p>PO3: Critical thinking: Capability to apply analytic; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.</p> <p>PO4: Problem solving: Capacity to extrapolate from what one</p>

has learned and apply their competencies to solve different kinds of non-familiar problems and apply to real life situations.

PO5: Analytical reasoning: Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data; draw valid conclusions and support them with evidence and examples, and addressing opposing viewpoints.

PO6: Research-related skills: A sense of inquiry and capability for asking relevant/appropriate questions, synthesising and articulating; Ability to recognise cause-and-effect relationships, define problems, formulate and test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation

PO7: Cooperation/Team work: Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team

PO8: Scientific reasoning: Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective.

PO9: Reflective thinking: Critical sensibility to lived experiences, with self-awareness and reflexivity of both self and society.

PO10 Information/digital literacy: Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate and use appropriate software for analysis of data.

PO 11 Self-directed learning: Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.

PO 12 Multicultural competence: Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.

PO 13: Moral and ethical awareness/reasoning: Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demonstrating the ability to identify ethical issues, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and

	<p>sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work.</p> <p>PO 14: Leadership readiness/qualities: Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way.</p> <p>PO 15: Lifelong learning: Ability to acquire knowledge and skills, including learning “how to learn”, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.</p>
Programme Specific Outcomes:	<p>PSO1: To enable students to apply basic microeconomic, macroeconomic and monetary concepts and theories in real life and decision making.</p> <p>PSO 2: To sensitize students to various economic issues related to Development, Growth, International Economics, Sustainable Development and Environment.</p> <p>PSO 3: To familiarize students to the concepts and theories related to Finance, Investments and Modern Marketing.</p> <p>PSO 4: Evaluate various social and economic problems in the society and develop answer to the problems as global citizens.</p> <p>PSO 5: Enhance skills of analytical and critical thinking to analyze effectiveness of economic policies.</p>

Highlights of the Revamped Curriculum:

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive

examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.

- The Core subjects include latest developments in education and scientific front, practical training, devising mathematical models and algorithms for providing solutions to real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Mathematics based problem solving skills are included as mandatory components in the 'Training for Competitive Examinations' course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- Project with viva-voce component enables application of conceptual knowledge to practical situations. The innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest.

Value additions in the Revamped Curriculum:

Semester	Newly introduced Components	Outcome/ Benefits
I	Foundation Course To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning Literature and analysing the world through the literary lens gives rise to a new perspective.	<ul style="list-style-type: none"> ➤ Instill confidence ➤ Create interest for the subject
I,II,III,IV	Skill Enhancement papers (Discipline centric / Generic/ Entrepreneurial)	<ul style="list-style-type: none"> ➤ Industry ready graduates ➤ Skilled human resource ➤ Equipped with essential skills to be employable
		<ul style="list-style-type: none"> ➤ Training on language and communication skills enable to gain knowledge and exposure in the competitive world.
		<ul style="list-style-type: none"> ➤ Discipline centric skill will improve the technical know-how of solving real life problems.
III,IV,V& VI	Elective papers	<ul style="list-style-type: none"> ➤ Strengthening the domain knowledge ➤ Introducing the stakeholders to the State of Art techniques from the streams of multi-disciplinary, cross disciplinary and interdisciplinary nature ➤ Exposure to industry-moulds students into solution providers ➤ Self-learning is enhanced ➤ Developing a research framework and presenting their independent and Intellectual ideas effectively.
Extra Credits: For Advanced Learners/ Honors degree		<ul style="list-style-type: none"> ➤ To cater to the needs of peer learners/ research aspirants
Skills acquired from the Courses		Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

**Choice Based Credit System (CBCS), Learning Outcomes Based Curriculum Framework (LOCF) Guideline Based Credit and Hours Distribution System
for all UG courses including Lab Hours**

* Part III components will be separately taken into account for CGPA calculation and classification for the under graduate programme and the other components. IV, V have to be completed during the duration of the programme as per the norms, to be eligible to obtain the UG degree.

MethodsofEvaluation		
InternalEvaluation	ContinuousInternalAssessmentTest	25 Marks

Eligibility for Admission to B.Sc., Computer Science & Information Technology:

Candidates who have studied Mathematics in HSC are eligible for this programme (item no. 11 of G.O. (D) No. 147, Higher Education (G1) Department dated 05.05.2023)

B.Sc Computer Science & Information Technology**2024-2025****First Year Semester-I**

Part	List of Courses	Credit	Hours per week (L/T/P)
Part-I	Language – Tamil	3	6
Part-II	English	3	6
Part III	Core 1: Object Oriented Programming using C++	5	5
	Core Practical: C++ Programming Lab	4	5
	Elective Course 1 Numerical Methods/ Discrete Mathematics	3	4
Part-IV	SEC-1 Multimedia Lab	2	2
	Foundation Course: Fundamentals of Information Technology	2	2
	Total	22	30
Semester-II			
Part	List of Courses	Credit	Hours per week
Part-I	Language – Tamil	3	6
Part-II	English	3	4
Part-III	Core 2: JAVA PROGRAMMING	4	5
	Core Practical: Java Programming	4	5
	Elective Course 2 Optimization Techniques / Trends in Computing	3	4
Part-IV	SEC 2: PHP Scripting Lab	2	2
	SEC 3:Quantitative Aptitude	2	2
	Naan Muthalvan – Language Proficiency for Employability	2	2
	Total	23	30

Semester-III

Part	List of Courses	Credit	No. of Hours
Part-1	Language – Tamil	3	6
Part-2	English	3	6
Part-3	Core Course- Data Structures and Algorithms	4	4
	Core Practical: Data Structures and Algorithms Lab	3	4
	Elective :Computational Intelligence/Computer Networks	3	4
Part-4	SEC 4: Practical: Web Application & Development Laboratory	2	2
	SEC 5 - Naan Mudhalvan	2	2
	E.V.S	2	2
		22	30

Semester-IV

Part	List of Courses	Credit	No. of Hours
Part-1	Language – Tamil	3	6
Part-2	English	3	6
Part 3	Core Course - Python Programming	4	4
	Core Practical: - Python Programming Laboratory	3	4
	Elective-Image Processing/ Cloud Computing	3	4
Part-4	SEC 6 Practical: Android Applications Development Lab	2	2
	SEC 7 Naan Muthalvan	2	2
	Value Education	2	2
		22	30

Semester-V

Part	List of Courses	Credit	No. of Hours
Part 3	Core Course 5 1 Software Engineering	4	5
	Core Course 5 2 Machine Learning	4	5
	Core Course 5 3 Database Management Systems	4	5
	Core Practical: Machine Learning Laboratory	4	5
	Mini Project	4	4
	Elective 5 1 Human Computer Interaction/Data Mining and Data Warehousing	3	4
Part-4	Naan Muthalvan	2	2
	Internship/ Industrial Visit / Field Visit	2	-
		27	30

Semester-VI

Part	List of Courses	Credit	No. of Hours
Part-3	Core Course 6 1 R Programming	4	5
	Core Course 6 2 Simulation & Modeling	4	5
	Core Practical: R Programming Laboratory	4	4
	Project	4	6
	Elective 6.1 Robotics and its Applications/ Pattern Recognition	3	4
	Elective 6.2 Cyber Security/ Fuzzy Logic	3	4
Part-4	Extension Activity	1	-
	Naan Muthalvan	2	2
		25	30

Internship: The students should submit certificate of attendance from the industry along with report for external evaluation.

Industrial visit/Field visit/Knowledge Updation Activity: A report should be submitted for external evaluation.

Internship/ Industrial visit/Field visit/Research Knowledge Updation Activity: Internal – 50 Marks, External – 50 Marks

Project/ Mini Project: Individual or Group of Maximum Three members Project report should be submitted for external evaluation. Internal – 50 Marks, External – 50 Marks

Students who couldn't appear for Naan Muthalvan Course in a particular semester or who have failed in Naan Muthalvan Course should write the following Self-Study papers (External – 100 marks)

Semester	Title of the Paper
II	Soft Skills for Employability
III	Digital Skills for Employability – Office Fundamentals
IV	Web Designing
V	Internet Basics
VI	C Programming

CC1; Core Course 1: OBJECT ORIENTED PROGRAMMING USING C++

Subject Code	L	T	P	S	Credits	Inst. Hours	Marks		
							CIA	External	Total
	5	0	0	1	5	5	25	75	100
Learning Objectives									
LO1	To inculcate knowledge on Object-oriented concepts and programming using C++.								
LO2	Demonstrate the use of various OOPs concepts with the help of programs								
Unit	Contents								No. of Hours
I	OOP Paradigm – Concepts of OOP – Benefits of OOP - Object Oriented Languages – Applications of OOP – OOP Design: Using UML as a Design Tool Beginning with C++								15
II	Tokens, Expressions and Control Structures - Functions in C++ : Function Prototyping – Call by Reference - Return by Reference – Inline Function – Default Arguments – Const Arguments – Recursion – Function Overloading – Classes and Objects								15
III	Constructors and Destructors: Constructors – Parameterized Constructors – Multiple Constructors – Constructor with default Arguments – Copy Constructors – Dynamic Constructor – Destructors – Operator Overloading and Type Conversions: Operator Overloading – Overloading Unary Operators – Overloading Binary operators – Rules for Operator Overloading – Type Conversions								15
IV	Inheritance: Introduction – Types of Inheritance – Virtual Base Classes – Abstract Classes – Pointers - Virtual Function - Polymorphism								15
V	Templates: Class Templates – Function Templates – Overloading of template Function – Exception Handling								15
TOTAL								75	
CO	Course Outcomes								
CO1	Outline the C++ programming fundamentals and the concepts of object-oriented programming like object and class, Encapsulation, inheritance and polymorphism.								
CO2	Classify the control structures, types of constructors, inheritance and different type conversion mechanisms.								
CO3	Analyze the importance of object oriented programming features like polymorphism, reusability, generic programming, data abstraction and the usage of exception handling.								
CO4	Determine the use of object oriented features such as classes, inheritance and templates to develop C++ programs for complex problems.								
CO5	Create a program in C++ by implementing the concepts of object-oriented programming.

Elective Course: EC1 A: NUMERICAL METHODS

COURSE OBJECTIVE:

L T P C
4 0 0 3

1. To introduce the concept of solving equations using different methods
2. To understand the use of Assignment and Transportation problems

Unit I:

Curve Fitting: Introduction, Method of Least squares, Curve Fitting, Fitting a Straight Line

Unit II:

Solution of Algebraic and Transcendental Equations: Bisection method, Regula Falsi method, Newton Raphson Method

Unit III:

Solution of Simultaneous Linear Equations: Solution of Simultaneous Linear Equations: Gauss Elimination method, Gauss-Jordan method, Gauss Seidel Method, Jacobi's method

Unit IV:

Numerical Differentiation & Integration: Differentiation: Using Newton's Forward Difference, Newton's Backward Difference, Newton's Divided Difference (First Order Differentiation only)

Integration: Using Trapezoidal rule, Simpson's 1/3 & Simpson's 3/8 rules

Unit V:

Solution of Ordinary Differential Equations: Runge-Kutta 2nd Order and 4th Order methods, Predictor-Corrector Methods: Milne and Adam's methods.

COURSE OUTCOME:

On successful completion of the course, the learners will be able to

1. Obtain numerical solutions of algebraic and transcendental equations
2. Solve system of linear equations numerically using direct and iterative methods
3. Solve ordinary differential equations
4. Compute integration using Simpson's & Trapezoidal Rule
5. Apply numerical methods in real life problems

	DISCRETE MATHEMATICS	Elective	4	-	-	I	3	25	75	100

COURSE OUTCOMES

On Successful completion of the course, the student will be able to

- CO1: To recall basic concepts for clear understanding of mathematical principles
- CO2: To explain practical problems.
- CO3: To construct matrices using discrete mathematics
- CO4: To analyze techniques to draw graph using mathematics
- CO5: To design graphs using the representations

Unit – I: RELATIONS

12 Hours

Introduction to Relations – Binary relation – Classification of Relations – Composition of Relations – Inverse of Relation – Closure operation on Relations – Matrix representation of Relation - digraphs.

Unit – II: FUNCTIONS

12 Hours

Introduction to Functions – Addition and Multiplication of Functions - Classifications of Functions – Composition of Function – Inverse Function.

Unit – III: MATHEMATICAL LOGIC

12 Hours

Introduction – Statement (Propositions) – Laws of Formal Logic –Basic Set of Logical operators/operations - Propositions and Truth Tables – Algebra Propositions - Tautologies and Contradictions – Logical Equivalence – Logical Implication – Normal Forms.

Unit – IV: MATRIX ALGEBRA

12 Hours

Introduction – Definition of a Matrix - Types of Matrices – Operations on Matrices – Related Matrices – Transpose of a Matrix – Symmetric and Skew-symmetric Matrices – Complex Matrix

– Conjugate of a Matrix – Determinant of a Matrix – Typical Square Matrices – Adjoint and Inverse of a Matrix – Singular and Non-singular Matrices – Adjoint of a Square Matrix – Properties of Adjoint of a Matrix – Properties of Inverse of a Matrix.

Unit – V: GRAPH

12 Hours

Introduction – Graph and Basic Terminologies – Types of Graphs – Sub Graph and Isomorphic Graph – Operations on Graphs – Representation of Graph.

SEMESTER II
JAVAPROGRAMMING

Subject Code	L	T	P	S	Credits	Inst. Hours	Marks		
							CIA	External	Total
	5	0	0	II	4	5	25	75	100

Learning Objectives

L O 1	To provide knowledge on fundamentals of object-oriented programming
L O 2	To have the ability to use the SDK environment to create, debug and run servlet programs

Prerequisites: Basic knowledge about programming concepts

Unit	Contents	No. of Hours
I	Fundamentals of Object-Oriented Programming: Introduction – Object Oriented Paradigm – Concepts of Object-Oriented Programming – Benefits of OOP – Evolution: Java History – Java Features – Differs from C and C++ – Overview of Java Language: Java Program – Structure – Tokens – Java Statements – Java Virtual Machine – Command Line Arguments	15
II	Constants, Variables and Data Types – Operators and Expressions – Decision making and Branching – Looping – Arrays – Strings – Collection Interfaces and classes	15
III	Classes objects and methods: Introduction – Defining a class – Method Declaration – Constructors – Method Overloading – Static Members – Nesting of methods – Inheritance – Overriding – Final variables and methods – Abstract methods and classes	15
IV	Multiple Inheritance: Defining Interfaces – Extending Interfaces – Implementing Interfaces – Packages: Creating Packages – Accessing Packages – Using a Package – Managing Errors and Exceptions – Multithreaded Programming	15
V	Layout Managers – JDBC – Java Servlet: – Servlet Environment Role – Servlet API – Servlet Life Cycle – Servlet Context – HTTP Support – HTML to Servlet Communication	15
TOTAL		75

Course Outcomes

C O 1	Outline the basic terminologies of OOP, programming language techniques, JDBC and Internet programming concepts
----------------------	---

C O 2	Solve problems using basic constructs, mechanisms, techniques and technologies of Java
C O 3	Analyse and explain the behavior of simple programs involving different techniques such as Inheritance, Packages, Interfaces, Exception Handling and Thread and technologies such as JDBC and Servlets
C O 4	Assess various problem-solving strategies involved in Java to develop a high-level application.
C O 5	Design GUI based JDBC Applications and able to develop Servlets using suitable OOP concepts and techniques

Core Practical

Subject Code	Subject Name	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
CC2 -1	Java Programming Practical	Core	-	-	3	II	3	3	25	75	100
Learning Objectives											
LO1	To provide fundamental knowledge of object-oriented programming.										
LO2	To equip the student with programming knowledge in Core Java from the basics up.										
LO3	To enable the students to know about Event Handling .										
LO4	To enable the students to use String Concepts.										
LO5	To equip the student with programming knowledge in to create GUI using AWT controls.										
EXCERCISE	Details										
1	Write a Java program that prompts the user for an integer and then prints out all the prime numbers up to that Integer										
2	Write a Java program to multiply two given matrices.										
3	Write a Java program that displays the number of characters, lines and words in a text										
4	Generate random numbers between two given limits using Random class and print messages according to the range of the value generated.										
5	Write a program to do String Manipulation using CharacterArray and perform the following string operations: a. String length b. Finding a character at a particular position c. Concatenating two strings										
6	Write a program to perform the following string operations using String class: a. String Concatenation b. Search a substring c. To extract substring from given string										
7	Write a program to perform string operations using String Buffer class: a. Length of a string b. Reverse a string c. Delete a substring from the given string										
8	Write a java program that implements a multi-thread application that has three threads. First thread generates random integer every 1 second and if the value is even, second thread computes the square of the										

	number and prints. If the value is odd, the third thread will print the value of cube of the number.	
9	Write a threading program which uses the same method asynchronously to print the numbers 1to10 using Thread1 and to print 90 to100 using Thread2.	
10	Write a program to demonstrate the use of following exceptions. a. Arithmetic Exception b. Number Format Exception c. ArrayIndexOutOfBoundsException d. NegativeArraySizeException	
11	Write a Java program that reads on file name from the user, then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes	
12	Write a program to accept a text and change its size and font. Include bold italic options. Use frames and controls.	60
13	Write a Java program that handles all mouse events and shows the event name at the center of the window when a mouse event is fired. (Use adapter classes).	
14	Write a Java program that works as a simple calculator. Use a grid layout to arrange buttons for the digits and for the +, -, *, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero.	
15	Write a Java program that simulates a traffic light. The program lets the user select one of three lights: red, yellow, or green with radio buttons. On selecting a button, an appropriate message with “stop” or “ready” or “go” should appear above the buttons in a selected color. Initially there is no message shown.

EC2: Elective Course 2 A OPTIMIZATION TECHNIQUES

L	T	P	C
4	0	0	3

Course objectives:

1. To apply various optimization techniques for decision making.
2. To introduce the use of variables for formulating complex mathematical models in management, science and industrial applications

Course Outcome:

On successful completion of the course, the learners will be able to CO1. Formulate and solve Linear Programming Problems.

CO2. Analyze the usage of Sequencing Problems.

CO3. Evaluate Queueing Models.

CO4. Apply PERT and CPM techniques to find the optimal solution.

UNIT I

12 hours

INTRODUCTION-LINEAR PROGRAMMING PROBLEM

The Nature and Meaning of OR – Management – Applications of OR – Modeling in OR – General methods for solving OR models – Scope of OR.

Linear Programming Problem: Formulation of LP problems – Graphical solution of LP problems – General formulation of LPP – Slack and Surplus variables – Standard form of LPP – Some important forms of LPP – Simplex Method I.

UNIT II

12 hours

ASSIGNMENT PROBLEMS

Assignment Problem: Mathematical formulation–Hungarian method– Unbalanced assignment problem – Various types

UNIT III

12 hours

TRANSPORTATION PROBLEMS

Transportation Model: Mathematical formulation – Matrix form–Methods for finding Initial Basic Feasible solution and Optimal solution – Degeneracy in Transportation Problems – Unbalanced Transportation Problem.

UNIT IV

12 hours

SEQUENCING PROBLEMS AND QUEUING MODELS

Sequencing Problems: Assumptions – Solutions to Sequencing Problems: Processing n jobs through 2 machines – Processing n jobs through 3 machines – Processing n jobs on m machines.

Queueing Models: Queueing System – Transient and Steady States–Kendal's Notation for representing Queueing Models – Various Models in Queueing System – Birth and Death Model.

UNIT V

12 hours

PERT AND CPM TECHNIQUES

PERT and CPM Techniques: Basic Steps – Network Diagram representation– Rules for drawing Network Diagram – Labeling Fulkerson's I–

J Rule – Time Estimates and Critical Path in Network Analysis – Examples on optimum duration and minimum duration cost – PERT.

	Trends in Computing	Elective	4	Y	-	-	3	4	25	75	100
Course Objective											
C1	Learning current trends in various computer science and information technology fields.										
C2	Learning various fields of Cloud computing, Green computing ,the Edge and Fog computing technology.										
C3	To learn about Architecture and Application design of Cloud, Edge & fog computing.										
C4	To know computingandtoimprove security services of computing technologies.										
C5	To learn the various Case Studies in Cloud, Edge & fog Computing.										
UNIT	Details										No. of Hours
I	Era of Cloud Computing: Introduction – Components of Cloud Computing – Cloud Types: Private, Public and Hybrid clouds – Limitations of the Cloud - Virtualization: Structure and Mechanisms.										12
II	Cloud computing Services: Software as a Service(SaaS) – Platform as a Service(PaaS)- Infrastructure as a Service(IaaS)-Database as a Service(DBaaS)- Recent Trends in cloud computing and Standards- Data Security in Cloud – Risks and Challenges with Cloud Data-Security as a Service.										12
III	Edge Computing: Edge Computing and Its Essentials: Introduction-Edge Computing Architecture- Advantages and Limitations of Edge ComputingSystems- Edge Computing Interfaces and Devices - Edge Analytics: Edge Data Analytics – Potential of Edge Analytics – Architecture of Edge Analytics – Case study										12
IV	Edge Data storage Security: Edge-Based Attack Detection and Prevention-Edge Computing Use Cases and Case Studies: Edge Computing High- Potential Use Cases. Introductionto green computing –Calculatingcarbonfootprint- Choosing Green PC path: A green make over – Buying green computer- ChoosingEarthFriendlyperipherals										12
V	Fog Computing: Introduction to Fog computing – Architecture - Characteristics - Fog Computing Services – Fog Resource Estimation and Its Challenges-Fog computing on 5G networks – Fog computing Use cases and Case studies.										12

Objectives

To predict the performance of different algorithms in order to guide design decisions, provide theoretical estimation for the required resources of an algorithm to solve a specific computational problem

LIST OF PROGRAMS

Required Hour

75

1. Perform stack operations
2. Perform queue operations
3. Perform binary tree traversal operations
4. Search an element in an array using linear search
5. Search an element in an array using binary search
6. Sort the given set of elements using Merge Sort.
7. Sort the given set of elements using Quick sort.
8. Search the Kth smallest element using Selection Sort
9. Sort the given set of elements using Insertion sort.
10. Find the Optimal solution for the given Knapsack Problem using Greedy Method.
11. Find all possible solution for an N Queen problem using backtracking method
12. Find all possible Hamiltonian Cycle for the given graph using backtracking method

Course Outcomes

CO	On completion of this course, students will
CO1	To understand the concepts of Linked List, Stack and Queue.
CO2	Concepts of Trees and Graphs. Perform traversal operations on Trees and Graphs. To enable the applications of Trees and Graphs.
CO3	To apply searching and sorting techniques
CO4	To determine the concepts of Greedy Method To apply searching techniques.
CO5	Usage of File handlings in python, Concept of reading and writing files, Do programs using files.

Course Outcomes

CO	On completion of this course, students will
CO1	Implement data structures using C
CO2	Implement various types of linked lists and their applications
CO3	Implement Tree Traversals
CO4	Implement various algorithms in C
CO5	Implement different sorting and searching algorithms

Mapping with Programme Outcomes:

CO/PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	3	3	3	3	3	3
CO 2	3	3	3	3	3	3
CO 3	3	3	2	2	3	3
CO 4	3	3	3	3	3	3
CO 5	3	3	3	3	1	2

Subject Code	Subject Name	Category	L	T	P	S	Credits	Inst.	Marks		
									CIA	External	Total
	Computational Intelligence	Elective	4	-	-	-	3	4	25	75	100
Course Objective											
C1	To identify and understand the basics of AI and its search.										
C2	To study about the Fuzzy logic systems.										
C3	Understand and apply the concepts of Neural Network and its functions.										
C4	Understand the concepts of Artificial Neural Network										
C5	To study about the Genetic Algorithm.										
UNIT	Details									No. of Hours	
I	Introduction to AI: Problem formulation – AI Applications – Problems – State Space and Search – Production Systems – Breadth First and Depth First – Travelling Salesman Problem – Heuristic search techniques: Generate and Test – Types of Hill Climbing.									12	
II	Fuzzy Logic Systems: Notion of fuzziness – Operations on fuzzy sets – T-norms and other aggregation operators – Basics of Approximate Reasoning – Compositional Rule of Inference – Fuzzy Rule Based Systems – Schemes of Fuzzification – Inferencing – Defuzzification – Fuzzy Clustering – fuzzy rule-based classifier.									12	
III	Neural Networks: Learning rules and various activation functions, Single layer Perception Back Propagation networks, Architecture of Backpropagation(BP) Networks, Back propagation Learning -Neural Network, Introduction to Associative Memory, Adaptive Resonance theory and Self Organizing Map,									12	
IV	Artificial Neural Networks: Fundamental Concepts – Basic Models of Artificial Neural Networks – Important Terminologies of ANNs – McCulloch-Pitts Neuron – Linear Separability – Hebb Network.									12	
V	Genetic Algorithm: Introduction – Biological Background – Genetic Algorithm Vs Traditional Algorithm – Basic Terminologies in Genetic Algorithm – Simple GA – General Genetic Algorithm – Operators in Genetic Algorithm									12	
Total							60				
Course Outcomes							Programme Outcomes				
CO	On completion of this course, students will										
1	Describe the fundamentals of artificial intelligence concepts and searching techniques.						PO1				
2	Develop the fuzzy logic sets and membership function and defuzzification techniques.						PO1, PO2				

3	Understand the concepts of Neural Network and analyze and apply the learning techniques	PO4, PO6
4	Understand the artificial neural networks and its applications.	PO4, PO5, PO6
5	Understand the concept of Genetic Algorithm and Analyze the optimization problems using GAs.	PO3, PO8

LearningObjectives: To develop an ability to design and implement static and dynamic website &Choose best technologies for solving web client/server problems			

Course Outcomes:(for students: To know what they are going to learn)

CO1: Study and Implement Webpages using Basic and Advanced HTML

CO2: Differentiate between functionalities of Basic CSS and Advanced CSS

CO3: Implement basic JavaScript.

CO4: Program basic functions in JavaScript and XHTML

Units	Contents
I	<ol style="list-style-type: none">1. Write a JavaScript to design a simple calculator to perform the following operations: sum, product, difference and quotient.2. Write a JavaScript that calculates the squares and cubes of the numbers from 0 to 10 and outputs HTML text that displays the resulting values in an HTML table format.3. Write a JavaScript code that displays text "TEXT-GROWING" with increasing font size in the interval of 100ms in RED COLOR, when the font size reaches 50pt it displays "TEXT-SHRINKING" in BLUE color. Then the font size decreases to 5pt.4. Develop and demonstrate a HTML5 file that includes JavaScript script that uses functions for the following problems: a. Parameter: A string b. Output: The position in the string of the left-most vowel c. Parameter: A number d. Output: The number with its digits in the reverse order5. Design an XML document to store information about a student in an engineering college affiliated to VTU. The information must include USN, Name, and Name of the College, Branch, Year of Joining, and email id. Make up sample data for 3 students. Create a CSS style sheet and use it to display the document.6. Change a Content of webpage using AJAX. Perform Different Operations using JQUERY Selectors.7. Create a XHTML form with Name, Address Line 1, Address Line 2, and E-mail text fields. On submitting, store the values in MySQL table. Retrieve and display the data based on Name.

	PYTHON PROGRAMMING	CCI	5	-	-	I	5	25	75	100
Learning Objectives										
LO1	To make students understand the concepts of Python programming.									
LO2	To apply the OOPs concept in PYTHON programming.									
LO3	To impart knowledge on demand and supply concepts									
LO4	To make the students learn best practices in PYTHON programming									
LO5	To know the costs and profit maximization									
UNIT	Contents									No. of Hours
I	Basics of Python Programming: History of Python-Features of Python-Literal-Constants-Variables - Identifiers–Keywords-Built-in Data Types-Output Statements – Input Statements-Comments – Indentation- Operators-Expressions-Type conversions. Python Arrays: Defining and Processing Arrays – Array methods.									15
II	Control Statements: Selection/Conditional Branching statements: if, if-else, nested if and if-elif-else statements. Iterative Statements: while loop, for loop, else suite in loop and nested loops. Jump Statements: break, continue and pass statements.									15
III	Functions: Function Definition – Function Call – Variable Scope and its Lifetime-Return Statement. Function Arguments: Required Arguments, Keyword Arguments, Default Arguments and Variable Length Arguments-Recursion. Python Strings: String operations- Immutable Strings - Built-in String Methods and Functions - String Comparison. Modules: import statement- The Python module – dir() function – Modules and Namespace – Defining our own modules.									15
IV	Lists: Creating a list -Access values in List-Updating values in Lists-Nested lists -Basic list operations-List Methods. Tuples: Creating, Accessing, Updating and Deleting Elements in a tuple – Nested tuples– Difference between lists and tuples. Dictionaries: Creating, Accessing, Updating and Deleting Elements in a Dictionary – Dictionary Functions and Methods - Difference between Lists and Dictionaries.									15
V	Python File Handling: Types of files in Python - Opening and Closing files-Reading and Writing files: write() and writelines() methods- append() method – read() and readlines() methods – with keyword – Splitting words – File methods - File Positions- Renaming and deleting files.									15

		TOTAL HOURS	75
Course Outcomes		Programme Outcomes	
CO	On completion of this course, students will		
CO1	Learn the basics of python, Do simple programs on python, Learn how to use an array.	PO1, PO2, PO3, PO4, PO5, PO6	
CO2	Develop program using selection statement, Work with Looping and jump statements, Do programs on Loops and jump statements.	PO1, PO2, PO3, PO4, PO5, PO6	
CO3	Concept of function, function arguments, Implementing the concept strings in various application, Significance of Modules, Work with functions, Strings and modules.	PO1, PO2, PO3, PO4, PO5, PO6	
CO4	Work with List, tuples and dictionary, Write program using list, tuples and dictionary.	PO1, PO2, PO3, PO4, PO5, PO6	
CO5	Usage of File handlings in python, Concept of reading and writing files, Do programs using files.	PO1, PO2, PO3, PO4, PO5, PO6

CourseCode		Image Processing		Credits 3
LectureHours:(L) perweek 4		TutorialHours: (T)perweek	LabPractice Hours: (P)perweek	Total:(L+T+P) perweek 4
CourseCategory:		Year&Semester: II & IV		AdmissionYear:
Pre-requisite				
LearningObjectives:(forteachers:whattheyhavetodointheclass/lab/field) <ul style="list-style-type: none"> • To become familiar with digital image fundamentals • To get exposed to simple image enhancement techniques in Spatial and Frequency domain. • To learn concepts of degradation function and restoration techniques. • To study the image segmentation and representation techniques. • To become familiar with image compression and recognition methods 				
Units	Contents			RequiredHours
I	DIGITAL IMAGE FUNDAMENTALS: Steps in Digital Image Processing – Components – Elements of Visual Perception – Image Sensing and Acquisition – Image Sampling and Quantization – Relationships between pixels - Color image fundamentals - RGB, HSI models, Two-dimensional mathematical preliminaries, 2D transforms - DFT, DCT.			12
II	IMAGE ENHANCEMENT: Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering– Smoothing and Sharpening Spatial Filtering, Frequency Domain: Introduction to Fourier Transform– Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters			12
III	IMAGE RESTORATION: Image Restoration - degradation model, Properties, Noise models – Mean Filters – Order Statistics – Adaptive filters – Band reject Filters – Band pass Filters – Notch Filters – Optimum Notch Filtering – Inverse Filtering – Wiener filtering			12
IV	IMAGE SEGMENTATION: Edge detection, Edge linking via Hough transform – Thresholding - Region based segmentation – Region growing – Region splitting and merging – Morphological processing- erosion and dilation, Segmentation by morphological watersheds – basic concepts – Dam construction – Watershed segmentation algorithm.			12
V	IMAGE COMPRESSION AND RECOGNITION: Need for			12

	data compression, Huffman, Run Length Encoding, Shift codes, Arithmetic coding, JPEG standard, MPEG. Boundary representation, Boundary description, Fourier Descriptor, Regional Descriptors – Topological feature, Texture - Patterns and Pattern classes - Recognition based on matching.

MSU

CourseCode:	Cloud Computing		Credits: 3
LectureHours:(L) perweek 4	TutorialHours: (T)perweek	LabPractice Hours: (P)perweek	Total:(L+T+P) perweek: 4
CourseCategory:Elective	Year&Semester: II Year IV Semester	AdmissionYear:	
LearningObjectives:(forteachers:whattheyhavetodointheclass/lab/field) <ul style="list-style-type: none"> To impart fundamental concepts of Cloud Computing. To impart a working knowledge of the various cloud service types and their uses and pitfalls. To enable the students to know the common features and differences in the service offerings of the three major Cloud Computing service providers, namely Amazon, Microsoft and Google. To provide know-how of the various aspects of application design, benchmarking and security on the Cloud. 			
CourseOutcomes:(forstudents:Toknowwhattheyaregoingtolearn) CO1: To understand the concepts and technologies involved in Cloud Computing. CO2: To understand the concepts of various cloud services and their implementation in the Amazon, Microsoft and Google cloud computing platforms. CO3: To understand the aspects of application design for the Cloud. CO4: To understand the concepts involved in benchmarking and security on the Cloud. CO5: To understand the way in which the cloud is used in various domains.			
Units	Contents	RequiredHours	
I	Introduction to Cloud Computing: Définition of Cloud Computing – Characteristics of Cloud Computing – Cloud Models – Cloud Service Examples – Cloud-based Services and Applications. Cloud Concepts and Technologies: Virtualization – Load balancing – Scalability and Elasticity – Deployment – Replication – Monitoring – Software Defined Networking – Network FunctionVirtualization – MapReduce – Identity and Access Management	12	
II	Cloud Services ComputeServices: Amazon Elastic Computer Cloud - Google Compute Engine - Windows Azure Virtual Machines. Storage Services: Amazon Simple Storage Service - Google Cloud Storage - Windows Azure Storage DatabaseServices: Amazon Relational Data Store - Amazon Dynamo DB - Google Cloud SQL - Google Cloud Data Store - Windows Azure SQL Database - Windows Azure Table Service	12	

	<p>Application Services: Application Runtimes and Frameworks - Queuing Services - Email Services - Notification Services - Media Services</p> <p>Content Delivery Services: Amazon CloudFront - Windows Azure Content Delivery Network</p> <p>Analytics Services: Amazon Elastic MapReduce - Google MapReduce Service - Google BigQuery - Windows Azure HDInsight</p> <p>Deployment and Management Services: Amazon ElasticBeanstack - Amazon CloudFormation</p> <p>Identity and Access Management Services: Amazon Identity and Access Management - Windows Azure Active Directory</p> <p>Open Source Private Cloud Software: CloudStack - Eucalyptus - OpenStack</p>	
III	<p>Cloud Application Design: Introduction – Design Consideration for Cloud Applications – Scalability – Reliability and Availability – Security – Maintenance and Upgradation – Performance – Reference Architectures for Cloud Applications – Cloud Application Design Methodologies: Service Oriented Architecture (SOA), Cloud Component Model, IaaS, PaaS and SaaS Services for Cloud Applications, Model View Controller (MVC), RESTful Web Services – Data Storage Approaches: Relational Approach (SQL), Non-Relational Approach (NoSQL).</p>	17
IV	<p>Cloud Application Benchmarking and Tuning: Introduction to Benchmarking – Steps in Benchmarking – Workload Characteristics – Application Performance Metrics – Design Consideration for Benchmarking Methodology – Benchmarking Tools and Types of Tests – Deployment Prototyping.</p>	12
V	<p>Cloud Security: Introduction – CSA Cloud Security Architecture – Authentication (SSO) – Authorization – Identity and Access Management – Data Security : Securing data at rest, securing data in motion – Key Management – Auditing.</p> <p>Case Studies : Cloud Computing for Healthcare – Cloud Computing for Energy Systems - Cloud Computing for Transportation Systems</p>	12

UNIT	Contents							No. of Hours			
I	Database Concepts: Database Systems - Data vs Information - Introducing the database -File system - Problems with file system – Database systems. Data models - Importance - Basic Building Blocks - Business rules - Evolution of Data models - Degrees of Data Abstraction							15			
II	Design Concepts: Relational database model - logical view of data-keys -Integrity rules - relational set operators - data dictionary and the system catalog - relationships -data redundancy revisited - indexes - codd's rules. Entity relationship model - ER diagram							15			

III	<p>Normalization of Database Tables: Database tables and Normalization – The Need for Normalization –The Normalization Process – Higher level Normal Form.</p> <p>Introduction to SQL: Data Definition Commands – Data Manipulation Commands – SELECT Queries – Additional Data Definition Commands – Additional SELECT Query Keywords – Joining Database Tables.</p>	15
IV	<p>Advanced SQL:Relational SET Operators: UNION – UNION ALL – INTERSECT – MINUS.SQL Join Operators: Cross Join – Natural Join – Join USING Clause – JOIN ON Clause – Outer Join.Sub Queries and Correlated Queries: WHERE – IN – HAVING – ANY and ALL – FROM. SQL Functions: Date and Time Function – Numeric Function – String Function – Conversion Function</p>	15
V	<p>PL/SQL:A Programming Language: History – Fundamentals – Block Structure – Comments – Data Types – Other Data Types – Variable Declaration – Assignment operation –Arithmetic operators.Control Structures and Embedded SQL: Control Structures – Nested Blocks – SQL in PL/SQL – Data Manipulation – Transaction Control statements. PL/SQL Cursors and Exceptions: Cursors – Implicit Cursors, Explicit Cursors and Attributes – Cursor FOR loops – SELECT...FOR UPDATE – WHERE CURRENT OF clause – Cursor with Parameters – Cursor Variables – Exceptions – Types of Exceptions.</p>	15
	Total	75

Course Outcomes		Programme Outcomes
CO	On completion of this course, students will	
CO1	Understand the various basic concepts of Data Base System. Difference between file system and DBMS and compare various data models.	PO1
CO2	Define the integrity constraints. Understand the basic concepts of Relational Data Model, Entity-Relationship Model.	PO1, PO2
CO3	Design database schema considering normalization and relationships within database. Understand and construct database using Structured Query Language. Attain a good practical skill of managing and retrieving of data using Data Manipulation Language (DML)	PO4, PO6
CO4	Classify the different functions and various join operations and enhance the knowledge of handling multiple tables.	PO4, PO5, PO6
CO5	Learn to design Data base operations and implement using PL/SQL programs. Learn basics of PL/SQL and develop programs using Cursors, Exceptions	PO3, PO5
Text Book		
1	Coronel, Morris, Rob, "Database Systems, Design, Implementation and Management", Ninth Edition	
2	Nilesh Shah, "Database Systems Using Oracle", 2nd edition, Pearson Education India, 2016	
Reference Books		
1.	Abraham Silberschatz, Henry F.Korth and S.Sudarshan, "Database System Concepts", McGraw Hill International Publication ,VI Edition	
2.	Shio Kumar Singh , "Database Systems ", Pearson publications ,II Edition	
Web Resources		
1.	Web resources from NDL Library, E-content from open-source libraries	

Machine learning lab

LTPCO
042

On Successful completion of the course, the student will be able to

CO1: Apply the concepts and practical knowledge in analysis, design and Development of computing systems

CO2: To make use of applications to multidisciplinary problems. CO3:

To discuss the knowledge about various algorithms

CO4: To interpret the knowledge about various datasets CO5: Develop data frames in Machine Learning

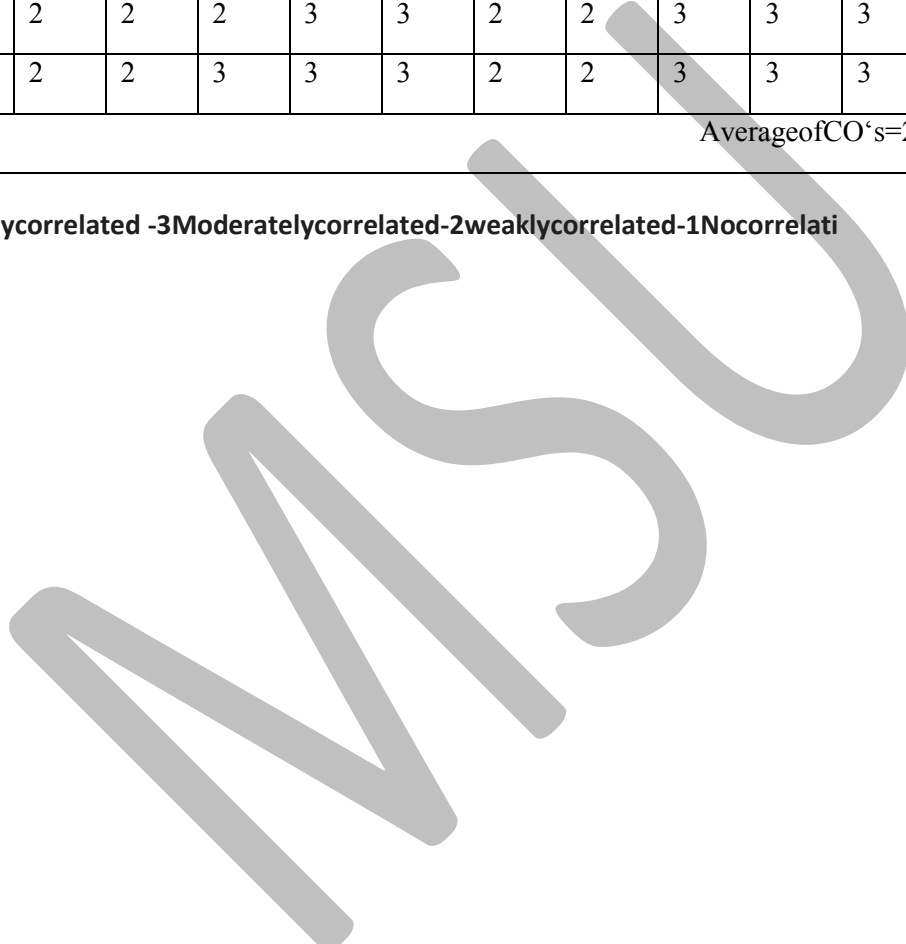

Exercises

1. Find the standard deviation for speed of a car using numpy
2. Find the percentile of a mark of students
3. Draw the histogram for Normal Distribution
4. Draw the scatter Plot
5. Polynomial Regression
6. Draw the decision tree.
7. Create Table and insert values using Python MySQL
8. Construct the query for retrieving relevant information from the table Python MySQL
9. Delete the records from the table.
10. Update the values from the table.

Semester VI

CourseCode	R Programming		Credits 4
LectureHours:(L) perweek 5	TutorialHours: (T)perweek	LabPractice Hours: (P)perweek	Total:(L+T+P) perweek 5
CourseCategory:	Year&Semester:	AdmissionYear:	
Pre-requisite			
LearningObjectives:(forteachers:whattheyhavetodointheclass/lab/field) <ul style="list-style-type: none"> • To understand and able to use basic programming concepts • To automate data analysis, working collaboratively and openly on code • To know how to generate dynamic documents 			
CourseOutcomes:(forstudents:Toknowwhattheyaregoingtolearn) CO1: To understand the problem solving approaches CO2: To learn the basic programming constructs in R Programming CO3: To learn the basic programming constructs in R Programming CO4: To use R Programming data structures - lists, tuples, dictionaries. CO5: To do input/output with files in R Programming.			
Units	Contents	RequiredHours	
I	INTRODUCTION -Overview of R, R data types and objects, reading and writing data, sub setting R Objects, Essentials of the R Language, Installing R, Running R, Packages in R, Calculations, Complex numbers in R, Rounding, Arithmetic, Modulo and integer quotients, Variable names and assignment, Operators, Integers, Factors, Logical operations	15	
II	CONTROL STRUCTURES AND VECTORS -Control structures, functions, scoping rules, dates and times, Introduction to Functions, preview of Some Important R Data Structures, Vectors, Character Strings, Matrices, Lists, Data Frames,	15	

	Classes Vectors: Generating sequences, Vectors and subscripts, Extracting elements of a vector using subscripts, Working with logical subscripts, Scalars, Vectors, Arrays, and Matrices, Adding and Deleting Vector Elements, Obtaining the Length of a Vector, Matrices and Arrays as Vectors Vector Arithmetic and Logical Operations, Vector Indexing, Common Vector Operations	
III	LISTS- Lists: Creating Lists, General List Operations, List Indexing Adding and Deleting List Elements, Getting the Size of a List, Extended Example: Text Concordance Accessing List Components and Values Applying Functions to Lists, Data Frames, Creating Data Frames, Accessing Data Frames, Other Matrix-Like Operations	15
IV	FACTORS AND TABLES - Factors and Levels, Common Functions Used with Factors, Working with Tables, Matrix/Array-Like Operations on Tables , Extracting a Sub table, Finding the Largest Cells in a Table, Math Functions, Calculating a Probability, Cumulative Sums and Products, Minima and Maxima, Calculus, Functions for Statistical Distributions R PROGRAMMING	15
V	OBJECT-ORIENTED PROGRAMMING S Classes, S Generic Functions, Writing S Classes, Using Inheritance, S Classes, Writing S Classes, Implementing a Generic Function on an S Class, visualization, Simulation, code profiling, Statistical Analysis with R, data manipulation	15

MSU

CourseCode	Simulation and Modeling		Credits 4
LectureHours:(L) perweek 5	TutorialHours: (T)perweek	LabPractice Hours: (P)perweek	Total:(L+T+P) perweek 5
CourseCategory:	Year&Semester:	AdmissionYear:	
Pre-requisite			
<p>LearningObjectives:(forteachers:whattheyhavetodointheclass/lab/field) In this course, modeling and simulation (M&S) methodologies considering the theoretical aspects. A wide range of Modeling and Simulation concepts that will lead you to develop your own M&S applications. Students learn the methodologies and tools for simulation and modeling of a real time problem/ mathematical model.</p>			
<p>CourseOutcomes:(forstudents:Toknowwhattheyaregoingtolearn) CO1:Introduction To Modeling & Simulation, Input Data Analysis and Modeling. CO2: Random Variate and Number Generation. Analysis of Simulations and methods. CO3:Comparing Systems via Simulation CO4: Entity Body Modeling, Visualization, Animation. CO5: Algorithms and Sensor Modeling.</p>			
Recap:(notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdoneduring2Tutorialhours)			
Units	Contents	RequiredHours	
I	Introduction To Modeling & Simulation – What is Modeling and Simulation? – Complexity Types – Model Types – Simulation Types – M&S Terms and Definitions Input Data Analysis – Simulation Input Modeling – Input Data Collection - Data Collection Problems - – Input Modeling Strategy - Histograms -Probability Distributions - Selecting a Probability Distribution.	15	
II	Random Variate Generation – Random Numbers – Random Number Generators – General principles – Inverse Transform Method –Acceptance Rejection Method – Composition Method –Relocate and Rescale Method - Specific distributions-Output Data Analysis – Introduction - Types of Simulation With Respect to Output Analysis - Stochastic Process and Sample Path - Sampling and Systematic Errors - Mean, Standard Deviation and Confidence Interval - Analysis of Finite-Horizon Simulations - Single Run - Independent Replications - Sequential	15	

	Estimation – Analysis of Steady-State Simulations - Removal of Initialization Bias (Warm-up Interval) - Replication-Deletion Approach - Batch-Means Method .	
III	Comparing Systems via Simulation – Introduction – Comparison Problems - Comparing Two Systems - Screening Problems - Selecting the Best - Comparison with a Standard - Comparison with a Fixed Performance Discrete Event Simulations – Introduction - Next-Event Time Advance - Arithmetic and Logical Relationships - Discrete-Event Modeling Approaches – Event-Scheduling Approach – Process Interaction Approach	15
IV	Entity Modeling – Entity Body Modeling – Entity Body Visualization – Entity Body Animation – Entity Interaction Modeling – Building Modeling Distributed Simulation – High Level Architecture (HLA) – Federation Development and Execution Process (FEDEP) – SISO RPR FOM Behavior Modeling – General AI Algorithms - Decision Trees - Neural Networks - Finite State Machines - Logic Programming - Production Systems – Path Planning - Off-Line Path Planning - Incremental Path Planning - Real-Time Path Planning – Script Programming -Script Parsing - Script Execution.	15
V	Optimization Algorithms – Genetic Algorithms – Simulated Annealing Examples: Sensor Systems Modeling – Human Eye Modeling – Optical Sensor Modeling – Radar Modeling.	15

LearningResources:

MSU

CourseCode	R Programming Laboratory		Credits 4
LectureHours:(L) perweek	TutorialHours: (T)perweek	LabPractice 4 Hours: (P)perweek	Total:(L+T+P) perweek
CourseCategory:	Year&Semester:		AdmissionYear:
Pre-requisite			
LearningObjectives:(forteachers:whattheyhavetodointheclass/lab/field) <ul style="list-style-type: none"> • Acquire programming skills in core R Programming • Acquire Object-oriented programming skills in R Programming. • Develop the skill of designing graphical-user interfaces (GUI) in R Programming • Acquire R Programming skills to move into specific branches 			
CourseOutcomes:(forstudents:Toknowwhattheyaregoingtolearn) CO1: To understand the problem solving approaches CO2: To learn the basic programming constructs in R Programming CO3: To practice various computing strategies for R Programming -based solutions to real world problems CO4: To use R Programming data structures - lists, tuples, dictionaries. CO5: To do input/output with files in R Programming			
LIST OF EXERCISES: <ol style="list-style-type: none"> 1. Program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user's choice. 2. Program, to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user. 3. Write a program to find list of even numbers from 1 to n using R-Loops. 4. Create a function to print squares of numbers in sequence. 5. Write a program to join columns and rows in a data frame using cbind() and rbind() in R. 6. Implement different String Manipulation functions in R. 7. Implement different data structures in R (Vectors, Lists, Data Frames) 8. Write a program to read a csv file and analyze the data in the file in R. 9. Create pie chart and bar chart using R. 10. Create a data set and do statistical analysis on the data using R. 11. Program to find factorial of the given number using recursive function 12. Write R program to count the number of even and odd numbers from array of N numbers

CourseCategory:	Year&Semester:	AdmissionYear:	
Pre-requisite			
LearningObjectives:(forteachers:whatttheyhavetodointheclass/lab/field) The objective of this course is to teach the fundamentals of fuzzy sets, relations and the various fuzzification and defuzzification methods.			
CourseOutcomes:(forstudents:Toknowwhatttheyaregoingtolearn) CO1: Understand the basics of Fuzzy sets, operation and properties. CO2: Apply Cartesian product and composition on Fuzzy relations and use the tolerance and Equivalence relations CO3: Analyze various fuzzification methods and features of membership Functions. CO4: Evaluate defuzzification methods for real time applications. CO5: Design an application using Fuzzy logic and its Relations.			
Recap:(notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdone during 2 Tutorial hours)			
Units	Contents	RequiredHours	
I	Introduction to Fuzzy Logic- Fuzzy Sets- Fuzzy Set Operations, Properties of Fuzzy Sets, Classical and Fuzzy Relations: Introduction-Cartesian Product of Relation-Classical Relations-Cardinality of Crisp Relation.	12	
II	Operations on Crisp Relation-Properties of Crisp Relations-Composition Fuzzy Relations, Cardinality of Fuzzy Relations-Operations on Fuzzy Relations-Properties of Fuzzy Relations-Fuzzy Cartesian Product and Composition-Tolerance and Equivalence Relations,Crisp Relation.	12	
III	Membership Functions: Introduction, Features of Membership Function, Classification of Fuzzy Sets,	12	

	Fuzzification, Membership Value Assignments, Intuition, Inference, Rank Ordering.	
IV	Defuzzification: Introduction, Lambda Cuts for Fuzzy Sets, Lambda Cuts for Fuzzy Relations, Defuzzification Methods, Fuzzy Rule-Based System: Introduction, Formation of Rules, Decomposition of Rules, Aggregation of Fuzzy Rules, Properties of Set of Rules.	12
V	Applications of Fuzzy Logic: Fuzzy Logic in Automotive Applications, Fuzzy Antilock Brake System-Antilock-Braking System and Vehicle Speed-Estimation Using Fuzzy Logic.	12
<p>LearningResources:</p> <ul style="list-style-type: none"> • RecommendedTexts <ol style="list-style-type: none"> 1. S. N. Sivanandam, S. Sumathi and S. N. Deepa-Introduction to Fuzzy Logic using MATLAB, Springer-Verlag Berlin Heidelberg 2007 • ReferenceBooks <ol style="list-style-type: none"> 1. Guanrong Chen and Trung Tat Pham- Introduction to Fuzzy Sets, Fuzzy Logic and Fuzzy Control Systems 2. Timothy J Ross , Fuzzy Logic with Engineering Applications • Webresources 		

Students who couldn't appear for Naan Muthalvan Course in a particular semester or who have failed in Naan Muthalvan Course should write the following papers (External - 100 marks)

Semester	Title of the Paper
II	Soft Skills for Employability
III	Digital Skills for Employability - Office Fundamentals
IV	Web Design using HTML
V	Internet Basics
VI	C Programming

MMSU

Soft Skills for Employability

Unit-I: The Verbs -. Sentence Structure

Unit-II: Comprehension - Spotting Errors

Unit-III: Letter Writing - Formal - Curriculum Vitae

Unit-IV: Report Writing - Job Interview

Unit-V: Functional Communication - Group Discussion

Texts Prescribed:

T.M. Farhathullah&D.S.Kesava Rao: Strengthen Your English for competitive Examinations. Emerald Publishers, Chennai

Digital Skills for Employability – Office Fundamentals

Unit I:

Word Processing: Open, Save and close word document; Editing text – tools, formatting, bullets; Spell Checker

Document formatting – Paragraph alignment, indentation, headers and footers, numbering; printing–Preview

Unit II:

Spreadsheets : Excel–opening, entering text and data, formatting, navigating; Formulas–entering, handling and copying; Charts–creating, formatting and printing

Unit III:

Power point: Introduction to Power point - Features – Understanding slide typecasting & viewing slides – creating slide shows. Applying special object – including objects & pictures – Slide transition–Animation effects, audio inclusion, timers.

Unit IV:

Database Concepts: The concept of data base management system; Data field, records, and files-Sorting and indexing data; Searching records. Designing queries, and reports; Linking of datafiles; Understanding Programming environment in DBMS; Developing menu driven applications in query language (MS–Access).

Unit V:

Microsoft Access –Creating Tables — Creating database - Creating a Table – Working onTables – Saving the Table – Defining primary Key – Closing the Table – Closing the Databasewindow

Text Book:

1. Jennifer Ackerman Kettel, Guy Hat-Davis, Curt Simmons, “Microsoft 2003”, Tata McGrawHill.
2. VIKAS GUPTA, “Comdex Computer Course Kit (XP Edition)”, Dreametech press, New Delhi.

References:

1. Stephen L. Nelson, “The Complete Reference office 2000” Tata McGraw – Hill Publishing Company limited, New Delhi.
2. N.Krishnan, “Window and MS Office 2000 with Database Concepts” Scitech publications (India) Pvt Ltd., Chennai

Web Design using HTML

Unit I: Introduction to HTML: Designing a Home page – History of HTML
– HTML generations – HTML tags

Unit II: HTML Documents-Anchor tag –Hyper links –Sample HTML documents –Designing a web page

Unit III: Head and Body section: Header Section –Title-Prologue-Links-Colorful web page –Comments lines Designing the body: Heading printing

Unit IV: Aligning the headings-Horizontal rule- paragraph-Tab settings-Image and pictures-Embedding PNG format Images.

Unit V: Ordered and unordered lists: List-Unordered lists- headings in a list – ordered lists- Nested lists.

Text Book:

World Wide Web Design with HTML, C. Xavier, TMH, 2001

Reference Book:

1. Internet & World Wide Web, H.M.Deital, P.J.Deital&A.B.Goldberg, Pearson Education
2. Fundamentals of information technology, Mathew's lenon and Alxis leon, Vijay Nicole private limited, Chennai.

Internet Basics

Unit I

The Internet: Introduction – From Computers to the Internet - Advantages of the

Internet – Major Internet Services – Hardware and Software for the Internet -
– TCP/IP - The Protocols of the Internet. World Wide Web: Architecture of the
World Wide Web –Types of websites – Uniform Resource Locator – Domain
Name System – Web Pages and Web Links – Visiting Web Pages — Searching
the Web – Google & Chrome Search Engines.

Unit II

Types of Internet Accounts – Selecting Internet Service Providers –Electronic
Mail: Advantages of E-mails – E-mail addresses – Mail transfer protocols –
Working of E-mail system.

Hosting and Promoting Websites: Structure of Websites – Web Development
tools – Hosting Websites –Getting a Domain /name – Visitor Analysis and
Statistics – Website Promoting methods.

Unit III

Electronic Commerce: E-Business and E-Commerce – Types of business in the
internet– M-Commerce - Marketing Strategies on the Web – Making Payments
in Virtual Stores –Shopping in Virtual Stores –Cookies and E-Commerce –
Major issues of E-commerce and M-Commerce

Unit IV

Blogs and Social Networking: Blogs – Uses of Blogs – Blogs System
Components –Steps for Blogging – Building a Blog site – Social Networking –
Etiquette in networkingsites.

Unit V

Internet Security: Importance of Internet Security – Internet Threats – Identity
theft and Cybersquatting – Hacking – Spamming and Spoofing – Phishing and
Pharming – Denial of Service – spyware – Viruses and worms- Security solutions
– Firewalls and Intrusion Prevention Systems –Internet Security Precautions-
The Information Technology Act.

Text Book:

The Internet A User's Guide Second Edition by K.L. James – PHI Learning
Private Limited Reference Books:

1. Internet, World Wide Web, How to program, 4th Edition, Paul Deitel, Harvey
M Deitel, Pearson
2. Learning Internet & Email, 4th Revised Edition, Ramesh Bangia, Khanna
Book Publishing Co Pvt Ltd.
3. Internet & Ecommerce, C. Nellai Kannan, NELS Publications.

MSU

Programming in C

Objective: To obtain knowledge about the structure of the programming language C and to develop the program writing and logical thinking skill.

Unit – I: INTRODUCTION C Declarations:- Character Set – C tokens – Keywords and Identifiers – Identifiers – Constants – Variables – Data types – Declaration of Variables –Assigning Values to Variables
Operators and Expressions:- Introduction – Arithmetic Operators – Relational Operators – Logical Operators – Assignment Operators – Increment and Decrement Operators – Conditional Operator – Bitwise Operators – Special Operators
Input and Output Operations:-getchar() – putchar() – scanf() – printf().

Unit – II: CONTROL STRUCTURES Decision Making and Branching:- Decision Making with IF Statement – Simple IF statement – The IF...Else Statement – Nesting of IF...Else Statements – The ELSE IF ladder – The Switch Statement – The ?: Operator – The GOTO statement.

Unit – III: Decision Making and Looping:- The WHILE Statement – The DO Statement – The FOR statement.
ARRAYS One-dimensional arrays – Declaration of One-dimensional arrays – Initialization of One dimensional arrays - Two-dimensional arrays – Initialization of Two-dimensional arrays

Unit – IV: Character Arrays and Strings:- Declaring and Initializing String Variables – Reading Strings from Terminal – Writing Strings to Screen – String Handling Functions.

Unit V: FUNCTIONS User-Definedfunctions:- Need for User-defined functions – Definition of functions – Return Values and their Types – Function Calls – Function Declaration
The Scope, Visibility and lifetime of a variables. Structures and Unions:-

Text Book :

Programming in ANSI C – 6 th Edition by E Balagurusamy – Tata McGraw Hill Publishing Company Limited.

Reference Books:

1. Computer System and Programming in C by Manish Varhney, Naha Singh – CBS Publishers and Distributors Pvt Ltd.

2. Introduction to Computer Science, ITL Education Solutions Limited, Second Edition, Pearson Education

3. Computer Basics and C Programming by V. Rajaraman – PHI Learning Private Limited 4. Programming with C, Third Edition, Byron S Gottfried, Tata McGraw Hill Education Private Limited.
